## PROPOSAL FOR STRATEGIC PARTNERSHIP

### Empowering Youth Innovation and Shaping Canada's Future through the CodeHero Kids in Tech (KIT 1.0) Conference

Dear \_\_\_\_\_,

On behalf of CodeHero, Canada's leading technology academy for kids and teens (ages 7–17), we are pleased to invite you and your esteemed organization to partner with us on a historic national event: the **CodeHero Kids in Tech (KIT 1.0) Conference**, launching Fall 2026.

KIT 1.0 is North America's first dedicated youth tech innovation summit for ages 7–17. More than a conference, it is a visionary platform celebrating creativity, diversity, and the limitless potential of young innovators shaping the digital future.

At CodeHero, our mission is to equip the next generation with the skills and confidence to **create technology, not just consume it**. Having trained hundreds of young learners in programming, AI, cybersecurity, robotics, and engineering, we have seen firsthand the power of early innovation. As Canada accelerates toward an AI-driven global economy, empowering our youth is not just beneficial, it is essential.

#### At KIT 1.0 will:

- Showcase outstanding youth-led tech and science projects
- Foster representation and inclusion across diverse communities
- Inspire global recognition through international livestream
- Launch the **CodeHero Foundation 1.0** to support long-term youth innovation

#### Why Your Partnership Matters

Your support, financial or non-financial, will directly fuel access programs, workshops, speaker engagements, and the Foundation's seed fund for scholarships and youth-led tech initiatives.

We would be honoured to explore how your organization can play a strategic role in shaping this pioneering event. Contact us at [info@codehero.ca](mailto:info@codehero.ca) or **+1 (365) 440 4768**.

**Together, let's inspire a generation and build Canada's innovation future.**

Thank you!
